Sustainability management
software that **moulds** to
your needs...

IsoMetrix

IsoMetrix Sustainability Management

The IsoMetrix Sustainability Suite is an innovative, web-based sustainability management software solution that allows you to pursue compliance within a wide array of local and international statutory reporting requirements as well as voluntary disclosure initiatives. The solution facilitates legal compliance and empowers you to effectively govern your sustainability performance while providing a full audit trail to easily facilitate third party assurance. The IsoMetrix Sustainability Suite has rich functionality yet is easy to configure, simple to use, flexible and robust with the ability to extend as your mandatory or voluntary disclosure requirements evolve.

There is often a gap between stakeholders' need for information and a company's ability to provide full disclosure on the effectiveness of sustainability strategies. The IsoMetrix Sustainability Suite bridges this gap, empowering you to define, manage and attain your sustainability objectives. The system can mould to your exact requirements, for the distributed input and monitoring of sustainability data and also in providing output in line with your chosen compliance guidelines.

What do we offer?

Typical processes managed within IsoMetrix:

Planning

- Organisational Carbon Footprint Planning
- Emission Reduction Policies
- Building Statistics
- Offset Monitoring & Measurement
- Industry Baseline Data

Monitoring & Measuring

- Organisational Carbon Footprint Monitoring
- Individual Carbon Footprint Monitoring
- Multiple Emission Factor Exchange Tables
- Emission Types & Sub-Types
- Motor Vehicle Categories
- Flight Categories
- Electricity Categories
- Fuel Categories
- Paper Categories
- Waste Categories
- Consumable Types & Sub-Types
- Recycling Types & Sub-Types

Action

- Central Action Management
- Notifications and Alerts
- Workflow

Benefits

- Real-time sustainability dashboards and reports
- Detailed trend analysis, exception reporting
- Web-based data entry at source
- Flexibility allows you to configure a 100% fit
- Manage actions to ensure they are closed out
- Extensible to include full SHEQ, Governance and Risk management
- Environmental responsibility is simply good business. Real-time monitoring of sustainability information will enable you to focus on areas of inefficiency and reduce operating costs
- Track the progress of your emissions mitigation strategies

Rising energy costs make sustainable operating practices an imperative not only for the environment, but for your business itself. Triple bottom line reporting, if handled using tools that allow data to be collected immediately, can be a driver not only for lower emissions, but lower operating costs as well.

Only what is measured can be improved. And the closer to real-time these measurements are, the faster you will be able to devise improvement strategies. The dashboards provided by IsoMetrix allow each user to view trends and exceptions, and give them ownership over their emission targets, and the action plans put in place to reach these targets.

IsoMetrix lets IT serve business like never before

IsoMetrix is an agile application framework that allows non-technical people to quickly and easily create sophisticated web applications. This allows you to replace non-integrated paper and spreadsheet based systems with a centralized, secure, web-based system that manages your business processes.

Data can be entered at point of source, allowing you to have real-time reporting and dashboards throughout the year, rather than a last minute rush at year end.

Latest technology

IsoMetrix can either be deployed on a local server, a Metrix hosted server or in the Cloud.

The following technologies are used:

- The web application is coded in ASP.NET and built on the .NET Framework.
- The application database is built on SQL Server.
- SQL Server Reporting Services are used for reporting.
- Analytics - Charting, dashboards, KPIs and scorecards are powered by QlikView.

A dashboard is worth a thousand reports.

Unrivalled dashboarding –
Analytics powered by QlikView

IsoMetrix dashboards are powered by QlikView. QlikView is a leading Business Discovery software application. Its intuitive dashboards allow you stop guessing and start knowing how to make faster, smarter decisions.

- Uncover hidden trends and make discoveries that drive innovative decisions.
- Compare by year, region, category or other dimensions at the click of a button
- Ask questions and pursue insights on your own or collaboratively.
- Search across all your data to get the big picture—get results that let you see new connections and relationships between data sets.

Need help with implementation?

Training

Custom training material based on your configured solution is created to train all users. Train the trainer approach can also be followed.

IsoMetrix custom solutions

For expert enhancements or specialized applications you don't have time to create yourself, speak to an IsoMetrix Business Consultant, who can design and build a custom web-based application for you – within your budget and timeframe.
